RESEARCH

The advancement of smartphone technology introduces personal budgeting applications. These applications assist users to monitor and track their expenses and income. This allows budgeting applications to help users meet their financial goals while improving the user's spending habits. Budgeting applications are becoming more reliable and convenient way for users to monitor their finances in real time (CodeCash, 2025). This research mainly focuses and investigates other Android budgeting applications. Analysing and understanding the features, strengths, limitations, and appealing elements of existing budgeting applications will aid the design for a new budgeting application that will consist of the key features of these Android budgeting applications.

Wallet by BudgetBakers

Wallet by BudgetBakers is a popular budgeting application that offers users a free version or a subscription plan. Wallet by BudgetBakers does not clearly state their prices on their websites. These prices change depending on the method you use to sign up for a premium account (Bendig, 2026).

This budgeting application categorizes a user's spending and provides a detailed overview of your cash flow for the month automatically. Wallet by BudgetBaker also is very user friendly and easy to navigate, making it a popular budgeting application (Bendig, 2026). Figure 1 shows the user friendly budgeting application Wallet by BudgetBaker.

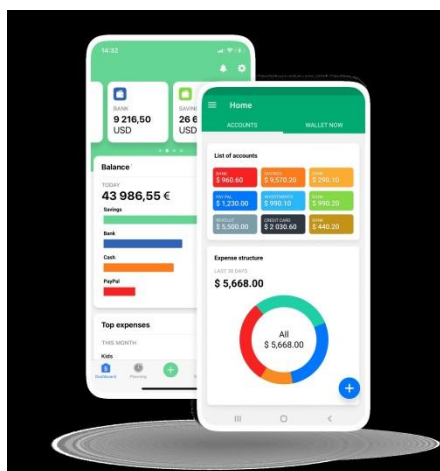

Figure 1: Preview of Wallet by BudgetBakers

Strengths

- Wallet by BudgetBakers is a user friendly application, making it easy for users to navigate throughout the application (BudgetBakers, 2026).
- This application can be shared with other users (Bendig, 2026).
- Creates a flexible budget which makes it easier to stay on track and achieve your goals (BudgetBakers, 2026).
- Your expenses can be tracked with a detailed insight and spending patterns. These expenses are automatically categorized (BudgetBakers, 2026).
- Automatically connect securely with 15000 banks all over the world for transaction syncing and balance updates at real time (BudgetBakers, 2026).

Weaknesses

- You would require a paid version to automatically sync your transactions (Bendig, 2026).
- The prices for the application are not defined clearly on the BudgetBaker's website and the prices change depending on the method you used to sign up for a premium account (Bendig, 2026).
- Premium features are not available to users who don't subscribe to a premium account. This limits what a user can do on the budgeting application (Bendig, 2026).

Innovative

- Multiple devices syncing so that the application can be available on various platforms (BudgetBakers, 2026).
- This budgeting application shows all financial accounts in one place (BudgetBakers, 2026).
- This application is normally ideal for users who prefer data reports and easy to read diagrams and charts to track their cash flows (Bendig, 2026).

LunchMoney

Lunch Money is a budgeting application that makes tracking your spending habits and managing your finances simple. This budgeting application offers a unique "set your own price" structure for payment. This makes Lunch Money more popular in the

community (LunchMoney, 2026). Lunch Money offers a wide range of features which include advance options such as multicurrency support, crypto portfolio synching. Lunch Money also includes automatic transactions imports, spending analytics and more (Bendig, 2026). Figure 2 shows the dashboard of Lunch Money for a user Lenny.

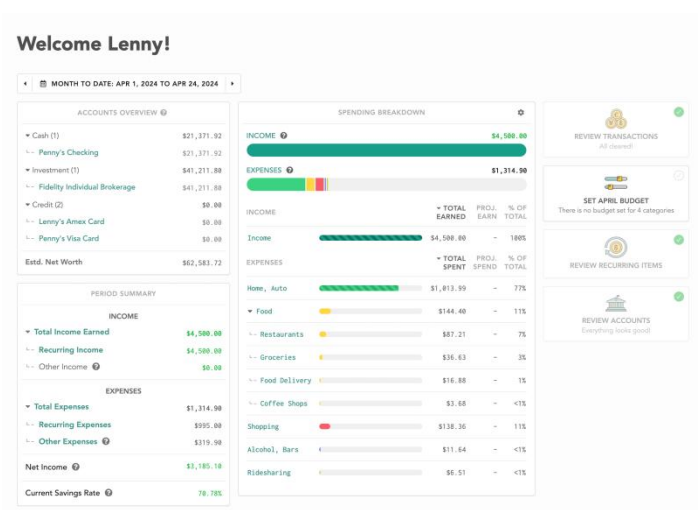

Figure 2: Lenny's Lunch Money dashboard

Strengths

- Lunch Money has a pay for what you want pricing plan (LunchMoney, 2026).
- This budgeting application releases new features, improvements and patches for bugs often making it reliable and efficient (LunchMoney, 2026).
- Lunch money is an application that is designed for users to understand spending patterns easier by the application generating graphs and reports (Bendig, 2026).
- Lunch Money support multicurrency natively (LunchMoney, 2026).
- Lunch Money is a platform that focuses on user data privacy (LunchMoney, 2026).

Weaknesses

- Lunch Money is a small team (LunchMoney, 2026).
- There are not many mobile application reviews making it difficult for users to trust the application (Bendig, 2026).
- Lunch Money does not offer a free version but offers a 30 day free trial (LunchMoney, 2026).
- Lunch Money focuses on budgeting and tracking mainly, limiting long term investment (Bendig, 2026).
- Lunch Money is optimized for desktop rather than a phone (Bendig, 2026).

Innovative

- This budgeting application supports multiple currencies at once (LunchMoney, 2026).
- Users have the opportunity to connect the application to other tools or create build custom tools and plug-ins (LunchMoney, 2026).
- This application helped to build a strong user community and feedback driven improvements (LunchMoney, 2026).

Spendee

Spendee is a budgeting application which is recommended for those who are new to budgeting or budgeting applications. Spendee is designed simple and its intuitive interface makes it a good option for beginners (Bendig, 2026). Spendee is available for free and its paid versions are cheaper compared to other budgeting applications. Spendee helps users gain a better understanding with their financial habits and set budgets specifically for a user. Spendee assists users with bill pay reminders, multiple currency support, and automatic transaction imports (Gord, 2025). Figure 3 shows the Spendee platform with graphs created.

Figure 3: Spendee Platform

Strengths

- Spendee has a user friendly interface making it easier for beginners to understand and use effectively (Gord, 2025).
- Free version is available but with limited resources (Bendig, 2026).
- Spendee lists all your financial activities that you have make is visually represented and categorized by the percentage of where your money goes (Bendig, 2026).
- Spendee assists users to monitor how much money comes in and goes out to ensure you are not spending excessively (Gord, 2025).
- Spendee assists users to stay within their set budgets (Bendig, 2026).

Weaknesses

- Spendee has limited features compared to other budgeting applications (Gord, 2025).
- Spendee can't be synchronized with all bank accounts. Spendee only has authorization for financial institutions that allow Spendee to do so (Gord, 2025).

Innovative

- Spendee is a budgeting application that is great for customization which helps to track your financial activities (Gord, 2025).
- Affordable for however a user chooses to budget themselves (Gord, 2025).
- Spendee offers shared wallets with other Spendee users (Gord, 2025).

Features

The new proposed budgeting application will implement various features inspired by the analysed applications. These features will include registration and login to ensure that the user's sensitive data is protected effectively. The user's sensitive data is very important and needs to be secured properly as the data stored contains financial records of users.

Expense tracking and expense categories will assist users to understand where and when their money has been spent. Tracking these expenses will give a clear indication to the users about their spending habits and where their money is used daily and monthly. The user will be able to set a monthly budget and the application will help the user to stay within their budgets that the user sets. Notifications and warnings will alert users if they are reaching their budget or going over budget.

Spending graphs and budget monitoring will be used to educate users of their spending habits and help users to budget effectively. By tracking the user's expenses, the application will be able to accurately assist users in ways for the users to stay within their budgets effectively. The spending graphs will aid the users to understand their spending patterns and how to budget their money more efficiently.

Budget goal tracking will also be implemented as it would aid a user to visually see their saving progress. The user interface for the new proposed budgeting application will incorporate simple components so that users understand how to use the components with ease. This will make the application more effective and convenient for new users. The application will also incorporate receipt photo uploads and gamification elements such as badges. These badges will be rewarded to users if they meet their monthly budget goals and other financial goals.

Conclusion

In conclusion, budgeting applications are the future to maintaining a successful budget plan. Budget applications offer and provide valuable tools for managing a user's personal finance. Analysing Wallet by BudgetBakers, Lunch Money, and Spendee, there are many key features that are identified which will improve the functionality, usability, and the overall financial awareness. By identifying these key features aid and guide the development and design of the new budgeting application. This new budgeting application will consist of the combination of the most efficient and effective components and elements of the existing Android applications. Additional features such as gamification and visual dashboards will also be introduced into the new budgeting application.
